

Prepay Geographic UK VoIP Numbers

PrepayGEO+

*01/02/03 Geographic
UK Numbers with
Freedom & Control
Anywhere! Anytime!*

01, 02 and 03 Geographic Local Phone UK Numbers (also known as geo numbers) give you a local presence and we can provide geographic phone numbers with any of the area codes across the UK. This can enhance your company's image as you can target specific areas of the UK to market to, even if you are not based there.

When you are called on that number, our system forwards the call to a fixed line or mobile phone of your choice, anywhere in the world.

***NOTICE:** We also port numbers to our network for customers who do not want to lose their existing geographic numbers! Give us a call to discuss on T. (+44) 08458740238*

New: If you've got a VoIP (SIP) system we can forward to that as well, as all our geographic numbers are VoIP SIP ready!

- [Call Conferencing](#) (supported IP sip phone devices only)

How it works

When people dial your 01 / 02 / 03 number, calls are automatically and instantly redirected to a business telephone number of your choice. This is commonly your existing landline number but can be a mobile phone number. When you choose your 01 / 02 / 03 geographic phone number you can choose where you want your geographic number diverted to from your online personal number management control panel.

Other Information

The promotional prices shown will remain in affect for the duration of your contract with us unless you default, in which case our standard charges will apply in accordance with our terms and conditions.
